

The Perfect Finish

Plockmatic introduces another breakthrough in booklet making – the Plockmatic 104 SquareFold. A new device that gives your saddle stapled and folded booklets the same professional look as a perfect bound book – completely flat finish and a printable spine. Use it offline for hand feeding or online with all existing Plockmatic booklet making/trimming systems.

Plockmatic 104 SquareFold

PLOCKMATIC - YOUR PARTNER IN DOCUMENT FINISHING PRODUCTS

Plockmatic 104 SquareFold

The SquareFold module is available in two configurations. The offline model for hand feeding or the online version that connects with any Plockmatic Trimmer. Within seconds the module is hung onto the trimmer, connected and ready to go. No need for a belt stacker

– the saddle stapled and folded booklets come out flat and hence stack neatly on the integrated delivery tray. Up to 1800 booklets will come out per hour with exactly the same flat finish look as a perfect bound (glue bound) book. No smell from glue, no warm up time, no hot and hazardous areas and what more – so much faster!

The square spine gives you also the option to print text on the spine to get that magazine/book look!

Add increased value to your booklets, offer your customer a professional look at a fraction of the cost for a perfect bound book.

The ideal choice for Copy Shops and Quick Printers as well as medium sized to small Commercial Printers.

The Plockmatic 104 SquareFold connected to the Plockmatic DocuVac system with the model 82/83 booklet maker/trimmer.

The Plockmatic 104 SquareFold can also be used for hand fed booklets.
